## Software project management case study examples

The best project management software can be just what you need. Especially if you spend too much time on boring manager, and don't have enough time doing your real job. Helping you to plan and share tasks and workloads, communicate effectively with customers, colleagues and team members, track everyone's time, generate invoices and more, the best software you'll have wondering how you've ever managed without it. However, the project management software market is a very busy one, with countless applications competing for their money. The good news is that many of them attempt to lure you in with free trials and free limited plans so you can try them out before you buy. This brings you the best project management software currently on the market. Meanwhile, if you need to refresh your design toolbox, check out our summary of the best free graphic design software too. Use Trello to easily display and organize yourself to perform lists and discussions on the visual board (Image Credit: Trello)Platform: Windows, Mac, iOS, Android, Browser | Free Version: Free Plan | Best for: The general interface of useClear's visually focused light learning lock curve features AdvancedTrello is not as complex or sophisticated as your average project management software. Instead the app offers an easy and very intuitive way to look at your entire project with a single view. With Trello you can organize cards: This card can be your thoughts, conversations and to do lists and be placed on board for everyone to collaborate on. This project management tool is completely free, but paid apps offer larger attachments, additional sticker packs, saved searches and more. Asana is a great job tracking and project management app for teams (Image Credit: Asana)Asana offers an easy way for teams to track their work, so everyone knows who's doing what, by the time. With tasks, projects, conversations and dashboards, Zana keeps your work organized and teammates accountable so you can move the job forward faster. You can also keep track of your work wherever you are, with mobile apps for both iOS and Android. Asana is free to use for small teams, while paid apps allow you to get more members and access features like custom backgrounds, task dependencies, and advanced search. Basecamp is a project management and collaboration tool for distributed teams (Image Credit: Basecamp)Platform: Windows, Mac, iOS, Android, Browser | Free Version: Free Plan Free Version (Personal Basecamp) or 30-Day Tnal | Best for: Distributing flexible system teams clear project view good chat tools are not the cheapest granddaddy of project management programs, Basecamp has a simple and easy to use interface that allows you to collaborate with your team and customers in a frictionless manner. It allows you to create multiple projects, set up discussions, write lists to perform, manage files, create and share documents, and organize dates for timing. It's soft Fully responsive so you can manage your projects and check them out On your mobile device is going. It's free for teachers and students, but \$99 a month for unlimited users and unlimited projects. (Image Credit: Monday.com) Platform: Windows, Mac, Android, iOS, Browser | Free Version: 14 Days Free Trial | Best for: There are teams that need a highly intuitive coaxingGood format virtual interface whiteboards without a tension free layout when it comes to fully featured project management tools. On the one hand, more features are better, to meet the unique needs of each project. On the other hand, that can lead to a sloppy and confusing interface that baffles new users. Monday.com are the squares that circle best. Its highly intuitive and highly customizable timing views mean that project managers can set things up in a way that team members can quickly get up. And that means they're more likely to actually use it, which is the key to the success of any project management software. (Image Credit: nTask) Platform: Browser, Android, iOS | Free Version: Free Plan | Best for: Saving moneyEasy to use the clear interface advanced features for freeNo Windows or Mac appnTask offers many tools you'd expect to see in fully featured and expensive project management software, but what's different is that a surprisingly large proportion of them are available in the plan forever free. Meanwhile the premium plan starts at quite affordable \$2.99 a month. nTask is fairly intuitive and easy to use in practice. And while it missed some more advanced customization options, and there is still no Windows or Mac app, those who find compromise more acceptable to get their hands on such a low or zero cost package. Teamwork Projects is the ultimate productivity tool for managing projects with your team platform: Android, iOS, Browser | Free Version: Free Plan or Trial 30 Days of Premium Version | Best for: Flexible Integrated Project Management Calendar Chart Gantt reports a good app integration can't mark PDFs or Images ProjectsTeamwork is a very flexible productivity tool for managing projects with your team. It allows you to keep all your projects, tasks and files all in one place and easily collaborate with each other. It helps you to visualize the entire project through the specified calendar, Gannet chart and launch report. The software supports file management with Google Drive, Box.com and Dropbox, as well as integration with leading apps such as third-party accounting software and customer support apps. Plans start from free, and range up to \$15 for premiums. Resources is a cloud guru based on the team's calendar that makes people's timing easy platform: Windows, Mac, iOS, Android, Browser | Free Version: 30-Day Trial | Best for: Large AgenciesStreamlined Daily Interfaces Recall Good Customer Support Lacks Bid's Search Capabilities as a Simple Way to Plan People, Equipment and Other Resources, Resource Guru Simple Resource Timing and Leave Management Tools That Are Designed to Keep Your Projects On Track Your team workload, get daily booking reminders, report on KPIs, and more.
